Top 50 GENIE3 results

5th percentile: $.05 \times 7840$ (interaction count) = index 392

Weight value at calculated index of adjacency matrix using randomized data: 0.048137

Smallest index of results with weight below this threshold: 968

968 statistically significant interactions, $(0.05 \times 968) = 48$ projected false positives
